DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35

U.S.C. 121:

- I. Claims 1-14, and 23-31, drawn to method for generating a pattern and pattern generation system, classified in class 250, subclass 492.22.
- II. Claims 15-22, drawn to a processor for processing images, classified in class 345, subclass 611.

2. The inventions are distinct, each from the other because of the following reasons:

3. Inventions defined as group I and group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention the processor has separate utility such as it can be shown to be usable in any graphics processing apparatus as illustrated in the cited art US Pat No. 5,852,443 issued to Kenworthy. Similarly, the pattern generation system and method

defined by group I can be separately usable in a lithography field without requiring the particulars of the processor of group II. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
